

CALCULATION BOOSTER

[May]

Contents

- ☒ Addition and Subtraction of Decimals
- ☒ Multiplication and Division of Decimals
- ☒ Addition and Subtraction of Fractions
- ☒ Multiplication and Division of Fractions

NAME:

PREFACE

Welcome to your Think Academy maths course; we're delighted that you've chosen to learn with us!

About Think Academy

Think Academy is part of the NYSE-listed TAL Education Group, trusted by over 30 million students and their families across the globe.

Over the past 18 years, Think Academy's expertise has focused on curriculum development and maths tuition, supporting students to excel in primary school level mathematics.

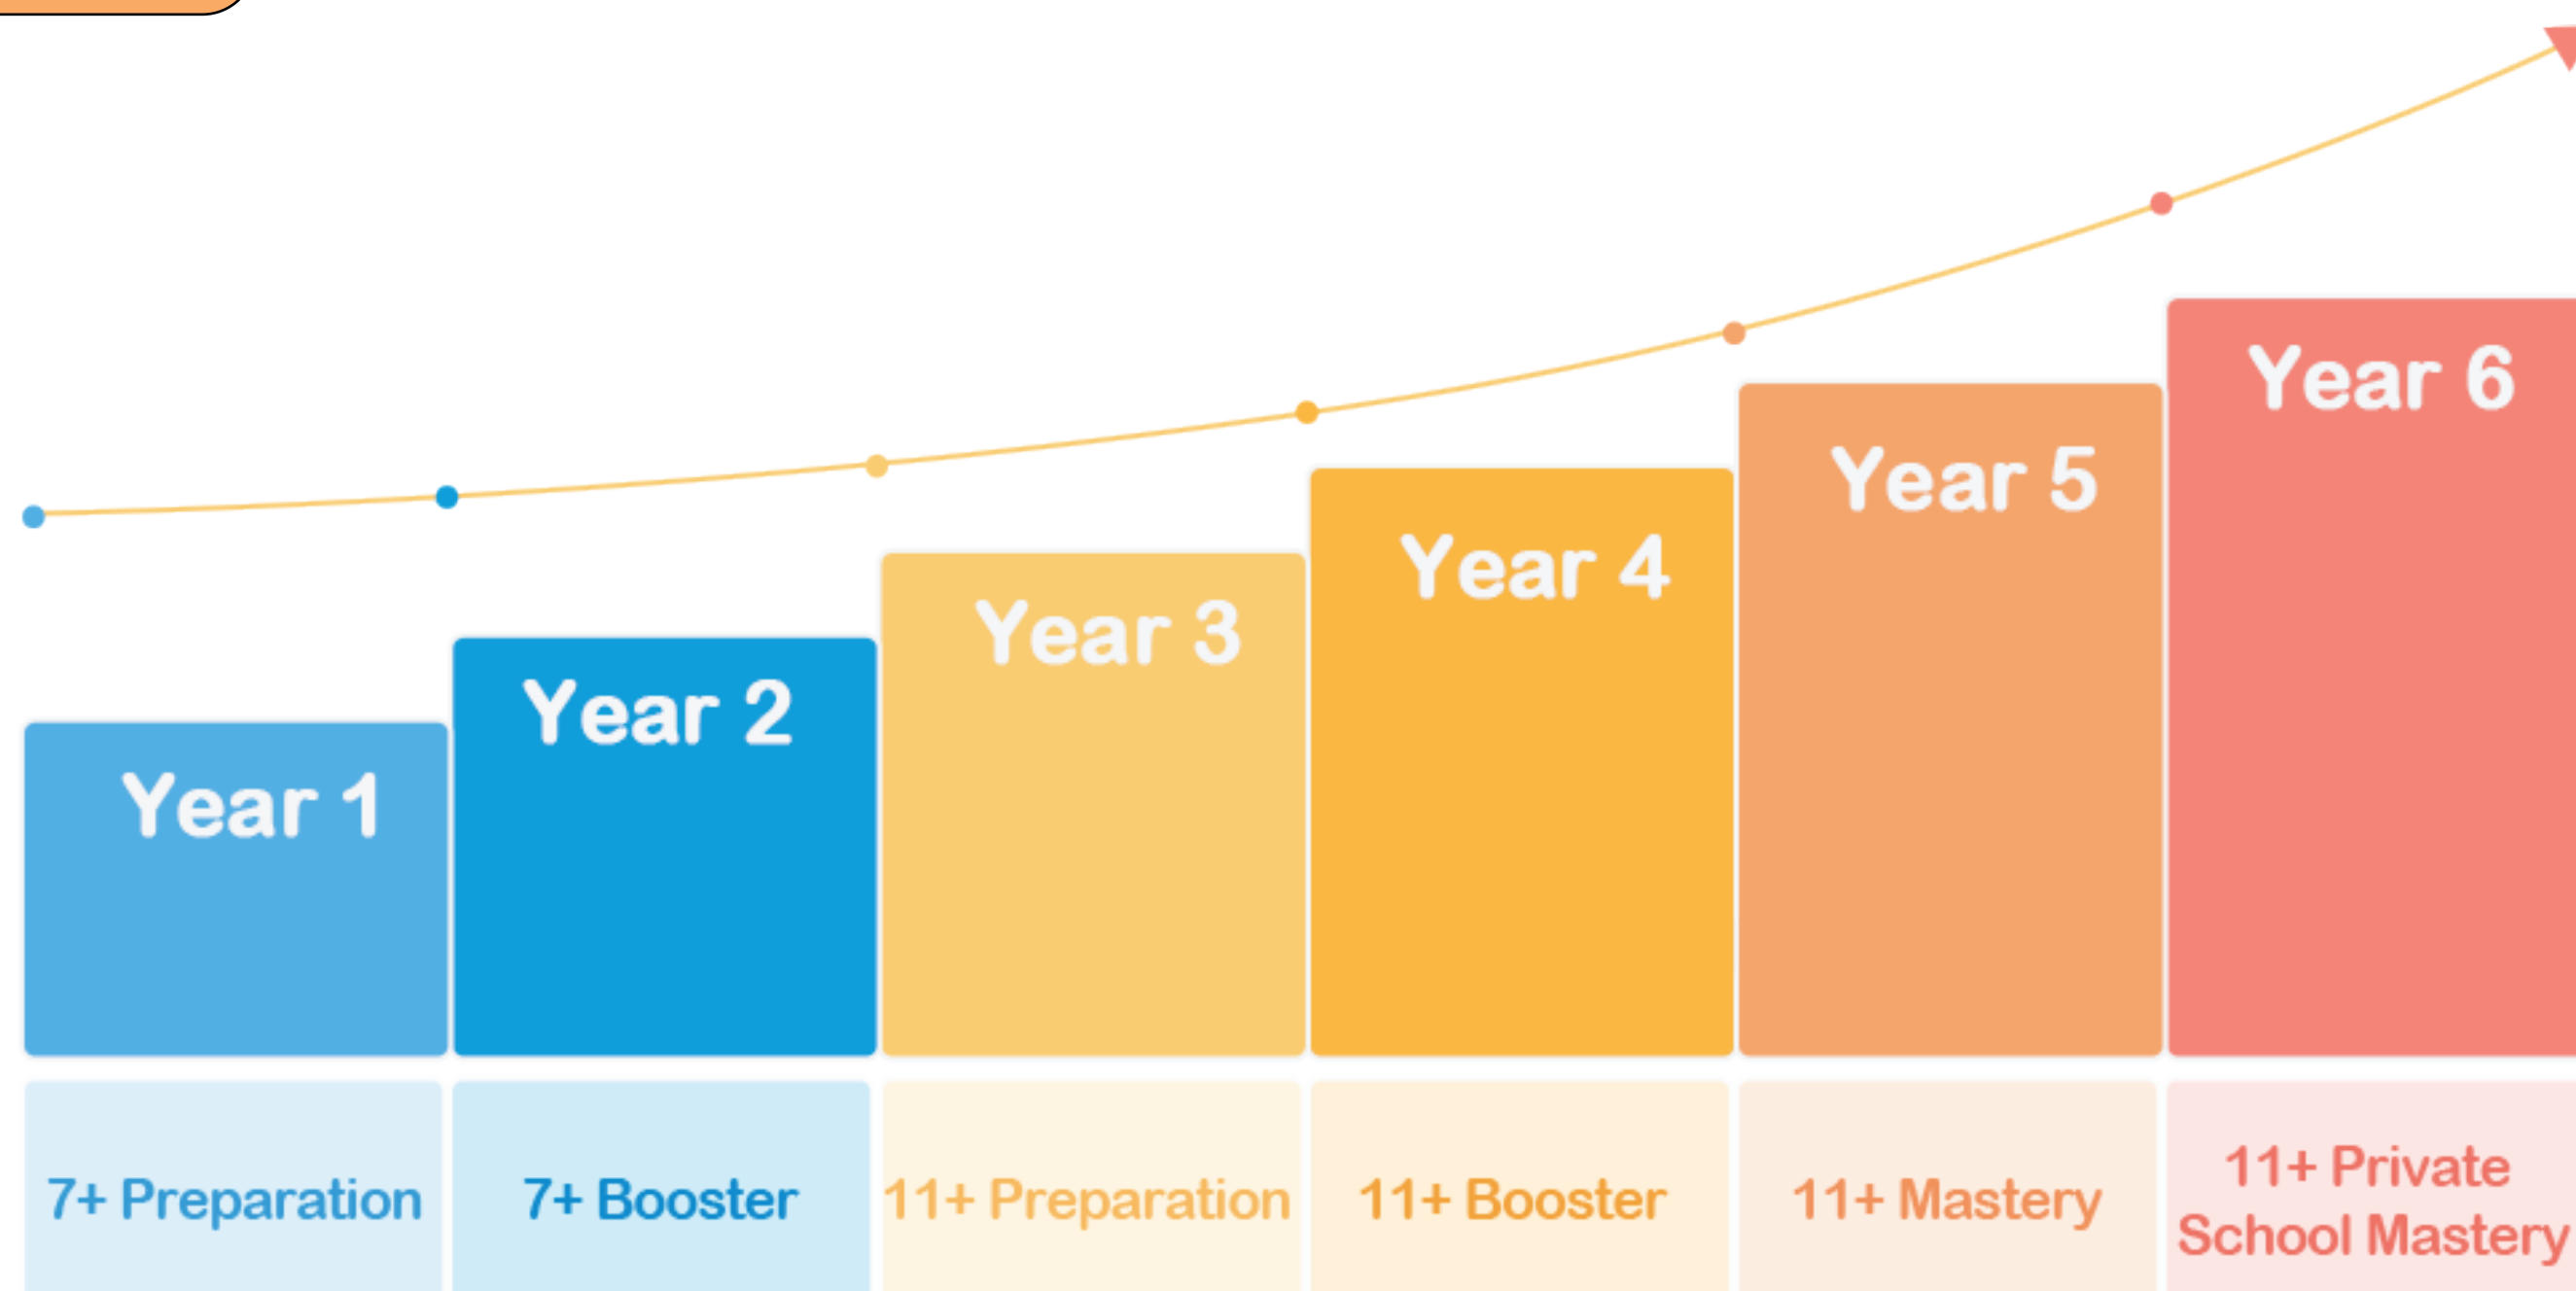

Our **bespoke online maths courses harness the power of technology** to ensure students achieve their full potential at primary school and throughout their **11+ journey**.

Throughout this online maths course, you and your child will experience a fully guided learning process, led by their tutor with additional support from the tutor's assistant.

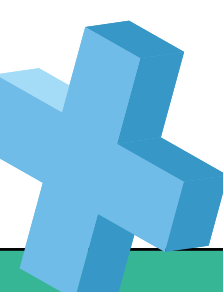

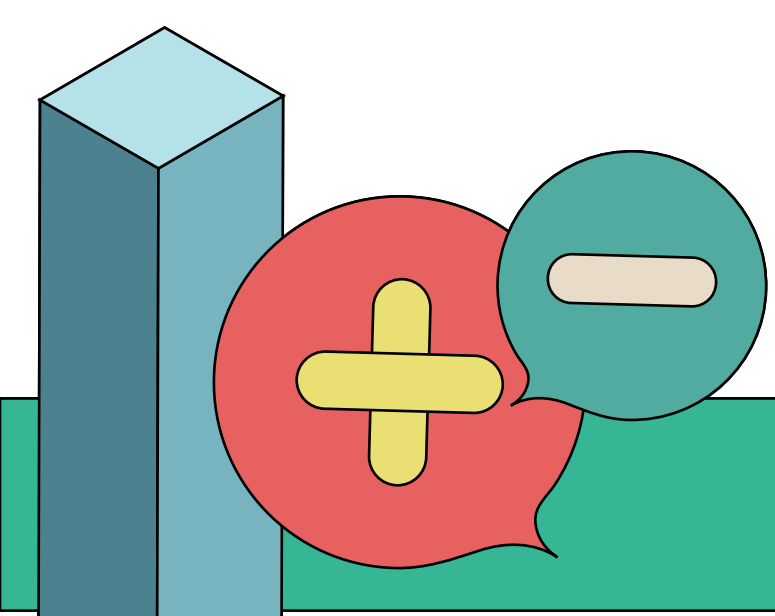

This course will introduce your child to new and challenging mathematical concepts. Their tutor will encourage your child to break boundaries by using the problem-solving techniques and fast calculation skills required to achieve 11+ mastery.

When it's time for class, open the Think Academy Classroom app to get started.

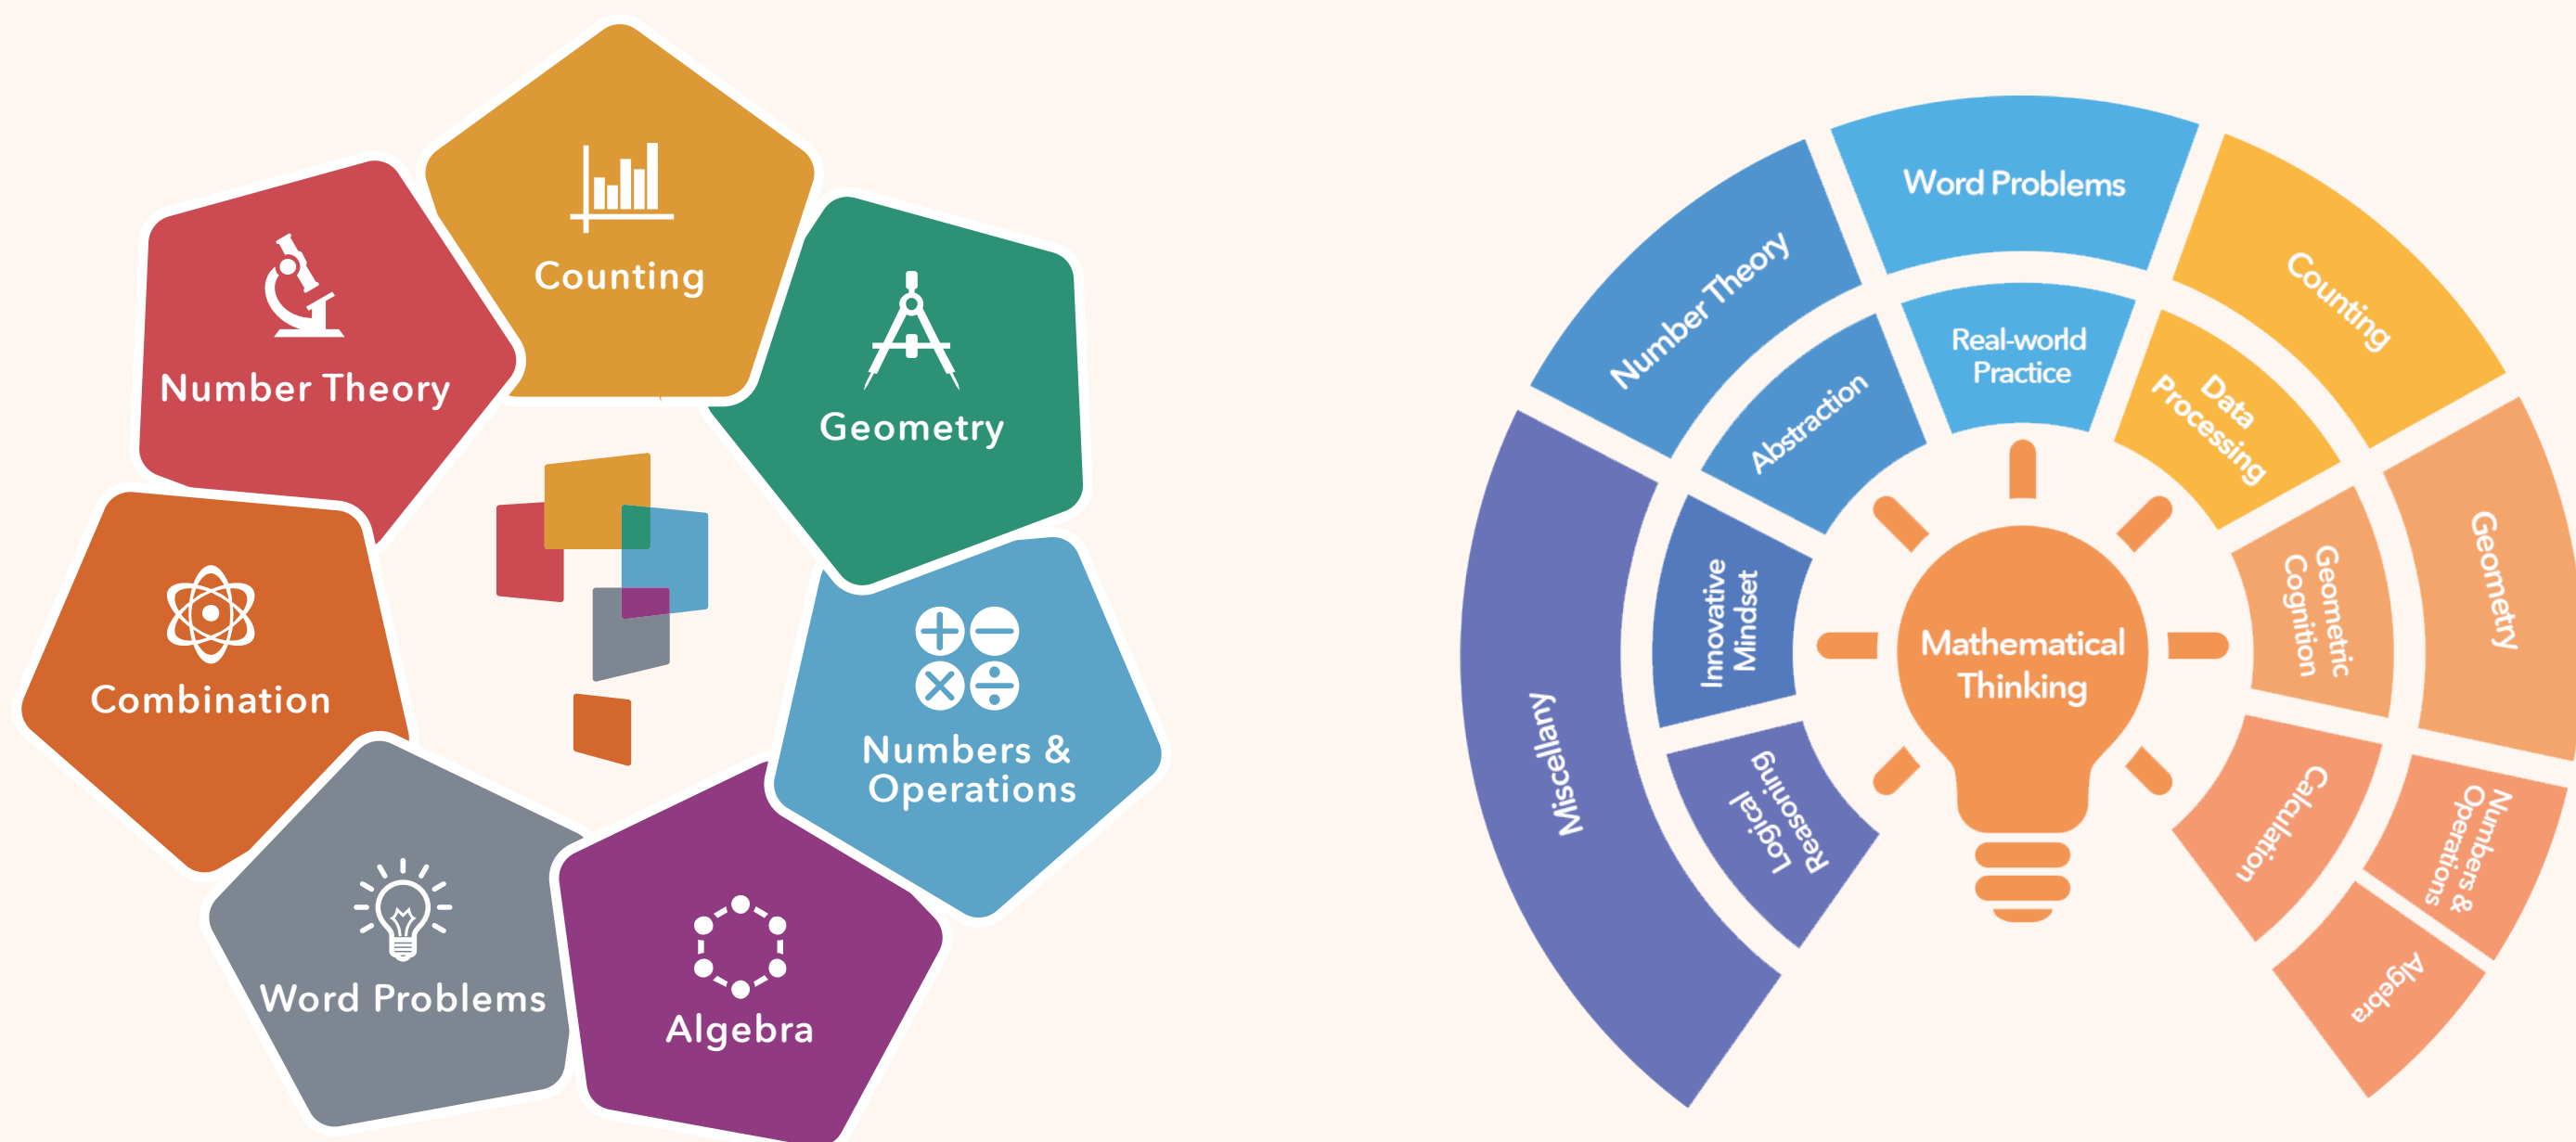

Our curriculum

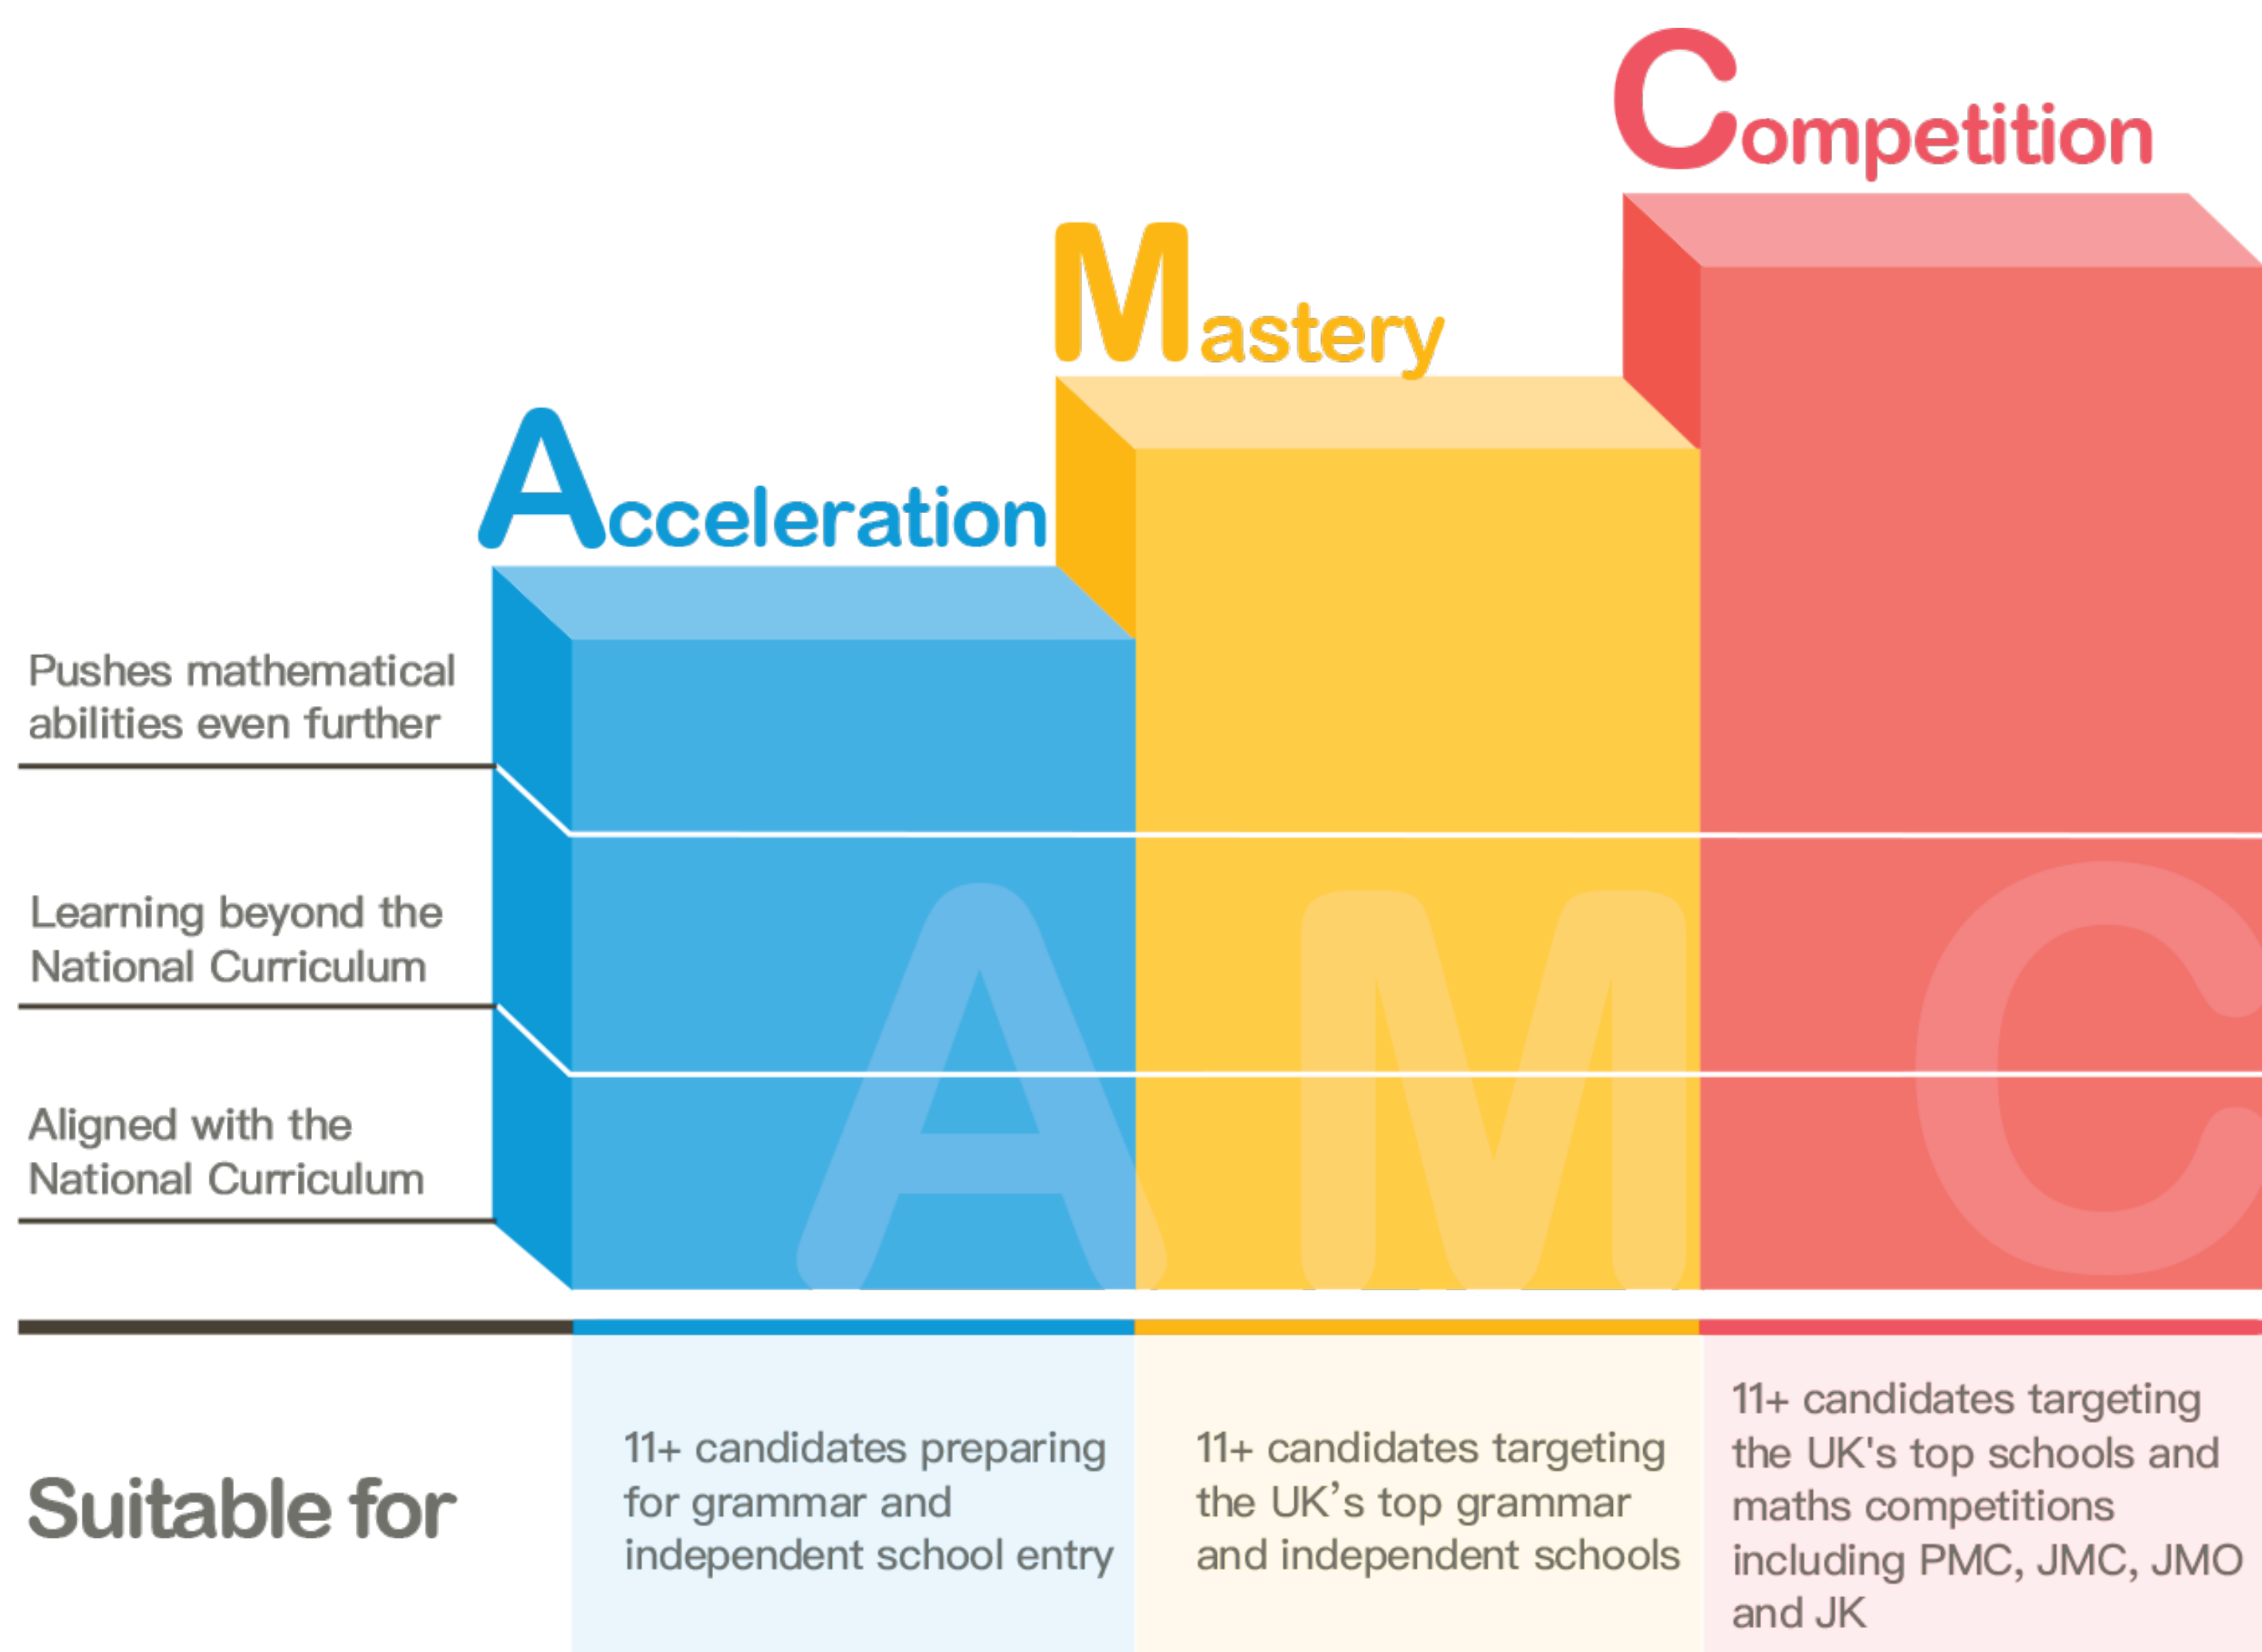

Think Academy's curriculum is designed to ensure students develop the necessary skills required for success in the UK National Curriculum, and later, in the 11+ exam. That is why our curriculum centres around the modules consistently used in all types of secondary school entrance exams.

Our curriculum

Level introduction

About this workbook

How can you use this workbook?

Think Academy's digitalised workbooks help learners develop the critical maths skills required to enter grammar or independent school successfully.

- Develop accuracy and efficiency in calculation, essential for solving questions quickly, through comprehensive practices.
- Establish confidence in mathematics, with the ability to absorb and adapt to new mathematical concepts promptly.
- Build a solid foundation in primary-level mathematics, using the building blocks necessary to approach more complex problems and achieve ultimate mastery.

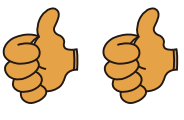

What's inside?

This workbook consists of daily exercises for learners to complete over one month.

Learners should aim to complete two sections each day: '**mental calculation**' and '**written calculation**'.

Top tips:

Keep an eye on the time! Note how long it takes the learner to complete each mental calculation exercise. We recommend using this guide as a reference:

- Under 10 minutes 
- Within 10 to 15 minutes 
- Above 15 minutes 

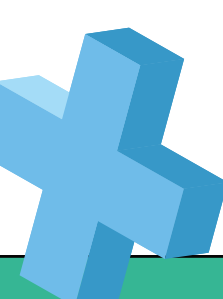

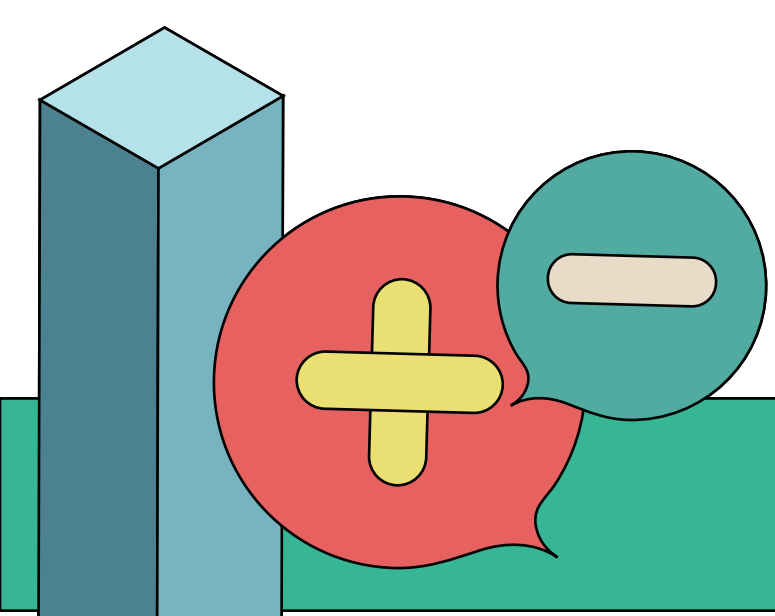

There is no time limit for the written calculation section as the content and difficulty level varies each week. Nevertheless, learners should still aim to be as quick as they can.

Make a note of mistakes and aim to track weekly progress.

- Use the "Stars Missed" section to jot down the learner's mistakes.
- Encourage the learner to correct their mistakes, colouring a star each time they successfully do so.
- Review progress each week, consider how long it takes to complete each exercise and the frequency of mistakes, as well as improvements.
- The learner can use their accumulated stars to create a constellation at the end of the month!

Good luck!

The Think Academy Team

Day 7			
Average			

Mental Calculation

Time Taken:

Stars Missed:

$\star () \div 1 = 18.8$

$\star 16.7 \div () = 8.35$

$\star () \div 5 = 1.9$

$\star () \div 2 = 5.9$

$\star () \div 4 = 4.7$

$\star 20.6 \div () = 20.6$

$\star 0.6 \div () = 0.2$

$\star () \div 2 = 4.55$

$\star () \div 1 = 5.7$

$\star () \div 4 = 3.55$

$\star 15.3 \div () = 1.53$

$\star () \div 1 = 5.8$

$\star 10.4 \div () = 5.2$

$\star () \div 3 = 3.8$

$\star () \div 2 = 10.2$

$\star 17.9 \div () = 8.95$

Written Calculation

$\star 8\frac{11}{17} \div \frac{21}{23} =$

$\star 4\frac{14}{15} \div 2\frac{9}{14} =$

$\star 3\frac{7}{15} \div 5\frac{5}{12} =$

$\star 3\frac{1}{12} \div 2\frac{3}{17} =$

$\star 10\frac{3}{20} \div 2\frac{1}{4} =$

$\star 2\frac{1}{16} \div 5\frac{1}{16} =$

$\star 2\frac{12}{25} \div \frac{2}{11} =$

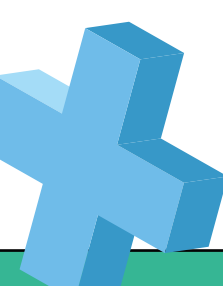

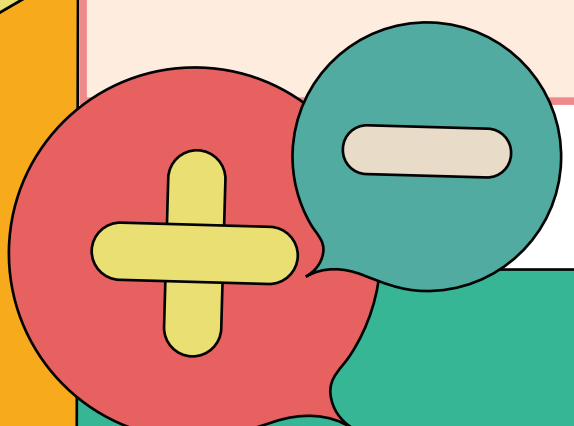

$\star \frac{3}{16} \div 8\frac{5}{8} =$
